INFORMATION ON THE 'ADOPT A TREE' PROGRAM

WHY ADOPT A TREE?

There are approximately 11,000 street trees in the City of Vincent and this number is increasing every year. Street trees provide significant environmental, economic and aesthetic benefits for your street and the wider community, creating an overall more liveable neighbourhood.

The City of Vincent is calling on residents, businesses and community groups to work in partnership to assist in the establishment of newly planted trees and to care for existing trees within our streetscapes.

Keeping our streets and verges green and healthy fosters biodiversity within our community and helps to establish biodiversity corridors and greenways – this is all part of the City's extensive 'Greening Plan'.

HOW CAN I ADOPT A TREE?

Anyone in the Vincent community can register as a tree adopter. Adopters can care for a street tree(s), or an entire streetscape in the following ways:

- » Watering the tree
- » Removing weeds from around the base of the tree
- » Observing the tree and reporting any issues

The City can support adopters by providing advice, resources and physical assistance when necessary. All you need to do is select a tree – preferably near your house or business, so you can keep an eye on it – and then fill out the registration form on the page over.

WHAT HAPPENS AFTER I ADOPT MY TREE?

Following registration, you will be provided with a pack which will assist you in caring for your adopted tree(s). You'll also be contacted by a member of the City's horticultural staff to arrange a site visit. Here we'll inspect your tree and provide advice on what general maintenance works and watering requirements are necessary to give your tree(s) the best chance of survival.

In future, annual tree workshops will be held at the City's Administration and Civic Centre to provide more advice on specialised tree pruning techniques and practices for tree adopters wishing to progress to a more advanced level of care.

Thank you for helping us green, cool and beautify Vincent!
