***Go with the Flow –  
Vincent makes Commitment to Water Conservation***

The Town of Vincent has further extended its commitment to the environment by joining a national water campaign to progress the sustainable management of precious water resources.

"Sustainable water supply management is a key environmental concern for the Town and we are further addressing the nation-wide need for water conservation by joining in the Water Campaign which is an international freshwater management programme which aims to build the capacity of local government to reduce water consumption and improve local water quality," said Mayor Nick Catania.

The Water Campaign is delivered by the International Council for Local Environmental Initiatives (ICLEI) Oceania in collaboration with local and state governments, water authorities and the Australian Government.

"Water is a precious resource and as a local authority we need to set an example for all our community by being at the forefront of water conservation and quality enhancement projects. Vincent is renowned for its parks and green spaces and in order to ensure that these features can be enjoyed now and into the future we must take proactive steps to efficiently manage the water supply and meet our environmental sustainability objectives," continued Mayor Catania.

As a participant in the programme the Town will receive on-going support and technical information to complement its existing environmental initiatives and water conservation strategies.

"This programme will help the Town to address water quality and water conservation issues in our daily operations and also within the community in the long-term," concluded Mayor Catania.
