Attachments: **1. Financial Statements as at 30 September 2025**

RECOMMENDATION:

That Council RECEIVES the Financial Statements for the month ended 30 September 2025 as shown in Attachment 1.

PURPOSE OF REPORT:

To present the statement of financial activity for the period ended 30 September 2025.

DELEGATION:

Regulation 34 (4) of the Local Government (Financial Management) Regulations 1996 requires the local government to prepare a statement of financial activity each month, which is to be presented to Council within 2 months after the end of the relevant month.

BACKGROUND:

Regulation 34 (1) of the *Local Government (Financial Management) Regulations 1996* requires a local government to prepare each month a statement of financial activity including the sources and applications of funds, as compared to the budget.

The following documents, included as **Attachment 1**, comprise the statement of financial activity for the period ended **30 September 2025**:

Explanation of Material Variances

The materiality thresholds used for reporting variances are 10% and $20,000, respectively. This means that variances will be analysed and separately reported when they are more than 10% (+/-) of the year-to-date budget and where that variance exceeds $20,000 (+/-). This threshold was adopted by Council as part of the budget adoption for 2025/26 and is used in the preparation of the statements of financial activity when highlighting material variance in accordance with *Financial Management Regulation 34(1) (d)*.
In accordance with the above, all material variances as at 30 September 2025 have been detailed in the variance comments report in **Attachment 1**.

Revenue by Nature or Type (on page 1) is tracking higher than the YTD budgeted revenue by $20,196 (0.0%). The following items materially contributed to this position:

- A favourable variance in interest earnings of $273,165 mostly due to a timing variance.
- A favourable variance of $151,689 in Fees and Charges due to a timing variance.
- A favourable variance of $44,311 in Other revenue mainly due to a timing variance
- A favourable variance of $33,548 in Rates revenue mainly due to a timing variance.
- An unfavourable timing variance in Operating grants, subsidies and contributions of $392,440.
- An unfavourable variance in Service charges due to lower Underground Power Service charges $90,077.

Expenditure by Nature or Type (on page 1) is favourable, attributed by an under-spend of $5,786,230 (28.2%). The following items materially contributed to this position:

- $3,721,119 favourable Depreciation expense due to timing variances.
- $2,101,691 favourable Materials and Contracts mainly due to UGP charges of $1.3m included in FY24-25 and other timing variances.
- $99,918 favourable Employee related costs due to timing variances.
- $28,914 favourable Utility expense due to timing variances.
- $177,994 unfavourable Other expenditure due to timing variances.

Surplus Position

The surplus position brought forward to 2025/26 is $5,082,481 compared to the adopted budget amount of $4,160,616. It is anticipated the actual opening surplus figure will be adjusted after the year audit has been finalised in November 2025.

The favourable opening surplus position is mainly due to capital carry forwards, higher operating revenue due to higher fees and charges and a higher brought forward Financial Assistance Grant payment, and lower operational expenditure.

Underground Power charges of $1.3m have been included in the 2024/25 result to account for costs incurred in the previous financial year.

A budget adjustment will be required to reduce operational costs to account for Underground Power charges recognised in the prior year and account for capital carry forward amounts.
