Sustainable Investments

The City's investment policy requires that in the first instance, the City considers rate of return of the fund. All things being equal, the City then prioritises funds with no current record of funding fossil fuels. The City can increase the number of non-fossil fuel investments but will potentially result in a lower rate of return.

Administration utilises a platform called 'Yield Hub' to ascertain the level of exposure banks have in fossil fuel activities and to determine daily interest rates published by banks.

The investment guidelines which is the supplementary document to the Council Investment Policy sets the maximum exposure limits to financial institutions at 90% as reflected in the below table. The majority of financial institutions lie within A-2 and A-1+ categories.

Short Term Rating (Standard & Poor's) or Equivalent	Direct Investments Maximum %with any one institution		Maximum % of Total Portfolio	
	Guideline	Current position	Guideline	Current position
A-1+	30%	23.3%	90%	45.5%
A-1	25%	0%	90%	0%
A-2	20%	17.5%	90%	54.5%

Administration will continuously explore options to ascertain if a balanced investment strategy can be developed where investments in divested banks can be increased with a minimal opportunity cost of loss in interest rate returns for instances when banks not divested in fossil fuel activities offer a higher rate of return.
