

ASBESTOS REMOVAL DECLARATION

CITY OF VINCENT

Health (Asbestos) Regulations 1992

Work Health and Safety (General) Regulations 2022

Code of Practice - How to Safely Remove Asbestos

The purpose of this declaration form to identify and safely manage asbestos removal as part of a building demolition process. The necessary work precautions adopted in the asbestos removal process, may vary depending on the type and quantity of asbestos, its condition, age and location.

NOTE: Contractors removing more than 10m² of asbestos will be required to hold a [WorkSafe licence](#).

Other:			

*** Condition assessment: **Good** = no mottling or visible fibres / **Fair** = minor mottling and/or few visible fibres / **Poor** = many visible fibres and/or mottling / **Variable** = some good, some fair, some poor etc

PROCEDURES	
Check each box, as a true and correct record, acknowledging compliance	✓
PRIOR TO REMOVAL	
The property will have signs and barriers erected to warn that 'asbestos removal is in progress' and to prevent unauthorised persons from entering.	
Notification will be provided to surrounding properties, prior to removal of asbestos.	
DURING REMOVAL	
All persons onsite will comply with the requirements of the Work Health and Safety (General) Regulations 2022 and the Code of Practice - How to Safely Remove Asbestos, in relation to asbestos removal.	
All persons onsite will wear appropriate personal protective equipment (PPE) such as coveralls, gloves, eye protection and P2 disposable respirator. Once asbestos removal is completed, the PPE will be placed in marked bags labelled 'asbestos waste' for disposal with the asbestos waste.	
No high pressure sprays or hoses will be used on any asbestos products.	
No power tools will be used on asbestos products, with the exception of removing screws/bolts.	
Asbestos will be wet down with water/PVA solution and kept wet during the removal process.	
All asbestos sheets will be removed with minimal breakage and will be cautiously lowered to the ground, not dropped or thrown.	
Asbestos cement residue remaining in the removal area will be cleaned using an approved vacuum.	
Asbestos fence sheeting will be removed in full intact pieces from below the ground surface.	
POST REMOVAL	
All asbestos will be removed from the site prior to demolition of remaining buildings commencing.	
The removed asbestos will be immediately stored on black polythene sheeting, wrapped and sealed into appropriate bundles for disposal.	
All asbestos waste will be labelled with the words 'CAUTION ASBESTOS' in 50mm high letters and disposed of at an approved landfill site.	

DECLARATION	
<p>I confirm:</p> <ul style="list-style-type: none"> that an asbestos assessment has been conducted of all buildings, structures and fencing to be demolished at the property; confirm that above procedures will be undertaken for the management of asbestos at the property; I understand the requirements for safe handling, removal and disposal of asbestos set out in the Work Health and Safety (General) Regulations 2022, Health (Asbestos) Regulations 1992 and the Code of Practice - How to Safely Remove Asbestos. I understand that if I fail to comply with the above requirements, I will be committing an offence under the Health (Asbestos) Regulations 1992 and may be liable to enforcement action.
