\*\*\*\*\*

### 1. Welcome / Declaration of Opening / Apologies

### 2. Confirmation of Previous Minutes

### 3. Business

- 3.1 Review of Update on Previous Agenda Items (5mins)
- 3.2 WALGA / Road Safety Report (5mins)
- 3.2 Integrated Transport Plan (40mins)

The City and Cardno have finalised background research which has been used to inform a SWOT analysis for each of the transport modes. The results of the background research and the SWOT analysis will be presented to UMAG members with discussions to be held surrounding the results.

We will be looking to understand your experience and knowledge surrounding each of the transport modes and whether you believe we have captured and displayed the appropriate information. Leading on from the discussions about the current transport network we will be asking you about what you believe the vision and priority for each mode should be. We will discuss each priority or vision in the context of the current network capacity and use your visions to help inform the direction of the final plan.

Just as a note, the purpose of this workshop is to ensure that the work we have done to date reflects what you already know and to discuss which high level direction the plan should be going. We will be coming back to the UMAG with more specific recommendations for transport projects once we have developed a draft Integrated Transport Plan that represents the overall vision and priorities.

CITY OF VINCENT

4. **General Business**
5. **Close / Next Meeting**

## **Update Information**
