LOCAL HISTORY COLLECTION MANAGEMENT POLICY

OBJECTIVES

The objectives of this Policy are to provide guidelines for the content, management, preservation, and promotion of the Local History Collection:

- To collect, document and permanently preserve all resource materials that reflect the history, development, culture and society of the City of Vincent area. The Collection may also cover Lake Monger and parts of Leederville not officially in the City Of Vincent but relevant to pre-1994 history, and other streets and places close to our boundaries, as boundaries may change;

- To promote the Collection as a significant part of the heritage of the area;

- To provide appropriate conditions for the conservation, storage and protection of the Collection and to maintain a permanent keeping place which includes an archival room for optimal preservation of unique documents and materials. This includes adequate storage for the digital archive of oral history interviews, photographs and various digital documents on a server as well as back up media, as it must remain future proof;

- To provide an information service to individuals, groups, elected members and council officers and to make the Collection accessible (where it is not to the detriment of original materials) to all interested people;

- To refer users to additional resources held by other institutions; and

- To provide access to, and guidance in family history research.
POLICY STATEMENT

It is anticipated that residents, former residents, those who currently work or formerly worked in the area, City of Vincent officers, researchers, students from primary to tertiary level, general library users and anyone interested in the social, cultural, and environmental history of the City will use and value the Local History Collection.

• The Collection should contain resources that will facilitate the study of local subjects in the greatest detail possible;

• The Collection should be thematically comprehensive, containing material on all aspects of the area: geographical, sociological, educational, historical, economic and political;

• The Collection will cover a time frame from the earliest recorded information about the area to the present day;

• The Collection should contain both current and retrospective materials;

• The Collection should consist of a wide variety of formats, including print materials, cartographic materials, photographic materials, audio-visual materials and digital formats;

• There will be both original materials and copies of original materials. Copies may be print or digital copies;

• The Collection should aim to be an archive for community organisations and businesses in the area;

• The Collection should be an archive for appropriate Council documents;

• The Collection should act as a reference point for researchers to sources of material both within and outside of the collection;

• The management of the Collection will be based on the premise that it is a permanent collection to be preserved and designed for long-term community use. It will be a reference collection, with items only loaned under special circumstances; and

• Monitor enquiries and usage to assist in collection development, access and promotion.
